2

Why?

Brief of the password manager application

Why did we choose this project?

We constantly keep forgetting our login credentials as we have accounts on several online platforms, we often overlook the strength of our login credentials like our passwords which need to be extraordinarily strong in this world of digital theft, making strong passwords and remembering them for each site we make an account on is tough. This solution provides an effective way of generating and storing strong login credentials for users to make handling plethora of accounts easy.

3

Features

What does the application do?

Features of the application

Features 1

Strong Password Generation.

Features 2

Multiple Password Regeneration.

Features 3

Encrypted password storage

Features 4

Encrypted card storage

4

Resources

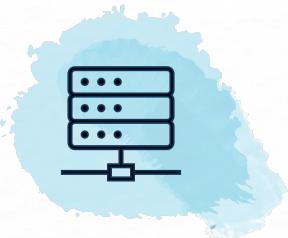

Front-end, Back-end and Database resources

What resources did we use?

Front - end

1. HTML
2. CSS
3. Bootstrap
4. JavaScript

Back - end

1. PHP

Database

1. MySQL Database

5

About the Application
